[SOT118] Functional programming - from LISP to JavaScript via Haskell

DJ Adams

May 31st, 2020

07:35 - 08:35 UTC

At the end of this session you'll understand why the reduce function exists in JavaScript, where it came from, and why it's so beautiful. And we'll start that journey of understanding in the 1950s with Lisp, and take a route via Haskell.
